About

As a 20-year-old self-taught software developer with over five years of coding experience, I have honed my skills in C#, .NET, PHP, SQL, Laravel, JavaScript, Solidity, HTML, CSS, and React. My journey began at 15, and over the past two years, I have specialized in blockchain development, particularly with Solidity. My adaptability and rapid learning abilities enable me to seamlessly integrate into new environments. Passionate about programming, I continuously seek to expand my knowledge and stay abreast of emerging technologies. I am eager to tackle new challenges and leverage my skills to drive business success.

Experience

LSi LTD / Web Developer
NOV 2023 - PRESENT, CLECKHEATON

- Currently developing new ecommerce personaliser on laravel application, creating endpoints for the personalisers API, testing routes and controllers.

-Use JavaScript and CSS to build scheme sites on AimSmarter/Web Enterprises for customers' products. Also creating laravel ecommerce stores for major customers like Caddick, Coversure, Hitachi etc.

-On a day to day I update products + download orders via the server to keep the websites we have looking fresh and updated reducing the risk of errors. I run tests on forge to test the health of the sites.

-Managed Jägermeister's Google Analytics to track website traffic, user behavior, and campaign performance, driving data-driven insights for optimizing digital marketing strategies.

Healthi Ai / Blockchain Developer
NOV 2023 - MAY 2024, REMOTE

-Collaborating with a team of 7 developing a Web3 Dapp working with solidity on the ethereum blockchain, using Openzeppelin, HardHat, developing ERC20 and ERC721 tokens

-Using my skills, I contributed my skills to a team of people all over the world, building a dapp that tracks your steps + activity giving you tokens the more active you are.

-Demonstrating flexibility and adaptability in responding to evolving project requirements and contributing innovative solutions to address challenges during development.

BELL Lighting / Junior C# Developer
AUG 2022 - JUL 2023, NORMANTON

- Developed a HR Management System to help work efficiency in the HR department which consists of PHP, Laravel, MySQL, HTML and JavaScript.

-Used C# to develop custom reports or dashboards to analyze data from our Epicor Database.

-Developed proficiency in SQL, creating back-end business data queries that improved the efficiency of the sales department.

-3D modeled + Animated one of BELL Lighting's Lamps without any prior knowledge / skills of modeling + animation

Q-Tap Systems / Junior PHP Developer
JUL 2021 - AUG 2022, LEEDS

-Collaborated with a senior developer to analyze and troubleshoot back-end PHP code, gaining valuable experience in problem-solving and PHP development.

-Designed custom layouts and themes for customers using CSS and React JS, incorporating unique color schemes, responsiveness, logos, and wording to meet specific branding requirements.

-Gained proficiency in PHP through a combination of online research and learning from my peers, eventually becoming able to write PHP code independently.

-Demonstrated a strong work ethic and a commitment to continuous learning and improvement during my time at Q-Tap Systems.

Freightology / Software Developer Apprentice
FEB 2021 - JUL 2021, LEEDS

-Demonstrated a commitment to expanding my knowledge and skills in the freight industry by working diligently as an apprentice at Freightology.

-Rapidly increased my proficiency in JavaScript through hands-on experience in updating and maintaining the front-end pages of the Freightology website and application.

-Developed a deep understanding of the freighting industry and its complex systems and processes through my work as an apprentice at Freightology.

Korelogic / Software Developer Apprentice
AUG 2020 - DEC 2020, LEEDS

-Developed strong communication skills, both with customers and peers, through my work at Korelogic.

-Utilized various resources to learn how to become a developer while at Korelogic, demonstrating a commitment to continuous learning and professional growth.

-Gained valuable experience in customer service and technical support, which would later prove useful in my role as a developer.
